

myQ Community Web Platform and app Win 2024 Security Sales & Integration MVP Award

OAK BROOK, IL, April 26, 2024 - [LiftMaster®](#), Chamberlain Group's leading brand of professionally installed access solutions, was named a winner of the 2024 Most Valuable Product (MVP) Award in the Security App category for the myQ Community web platform and app. *Security Sales & Integration's* Most Valuable Product (MVP) Awards reflect the most prestigious product awards program catering to the electronic security market. MVP Awards recognize the best technologies, products and solutions that keep lives and property safe.

myQ Community is a cloud-based platform and app that works with LiftMaster Smart Video Access Systems, offering secure access to apartments, condos, and gated communities. It's the only platform that integrates from community gate to in-unit lock, enabling control of leading smart lock brands, and creating a seamless self-access experience for residents. Whether it's access to the front gate, front door of the property, the mailroom, pool, gym, garage, or a resident's apartment, myQ Community can be used at every entrance of any community type.

"LiftMaster is thrilled to accept this award for best security app from Security Sales & Integration," said Jenny Lytle. "The feature-rich myQ Community web platform and app work with LiftMaster's ecosystem of access control hardware to provide one solution to securely manage all of a property's access needs, unlocking new ways for residents to access the property; it adds value for property managers who benefit from additional control and oversight of who is entering the property."

The myQ Community app, which has a 4.7-star rating in the Apple store, is designed to deliver elevated access control experiences for property owners, managers, and their residents, making it a must-have amenity. Residents can unlock any door they are authorized to open on the property through myQ Community which enables a best-in-class in-app experience to unlock entry points, including a "press to unlock" feature, PIN code usage, and the ability to remotely send a guest pass to visitors. Using smartphones, residents can enter the property at any point without searching for apartment keys that are easily misplaced or lost. The app works with LiftMaster Smart Video Access systems, providing residents with video features including one-way video calling and two-way video voice communication to identify guests before granting access.

According to Dan Ferrisi, group editor, commercial and security, Emerald, "The Most Valuable Product (MVP) Awards seek to honor vendors whose products and solutions achieve the highest aspiration in the electronic security industry: They keep people, property and physical environments safe. There could be no ambition more laudable." He continues, "Our independent panel of judges carefully considered each entry, evaluating these solutions on the basis of design and technological innovation, differentiating functional features and key integrator benefits. As such, the installer and integrator community can feel supremely confident when designing and specifying an MVP Award winner."
