

Stay Connected to Your Pets Anytime, Anywhere with myQ

By: myQ Editorial Staff

As pet parents, we know that our furry companions are more than just animals, they're cherished members of our family. Whether we're heading to work, running errands, or traveling, the thought of leaving them alone at home can be tough. That's why **myQ** is redefining pet care with innovative access and monitoring solutions, giving pet owners peace of mind like never before.

The Future of Pet Parenting: Seamless Smart Home Access and Monitoring

Gone are the days of wondering what your pet is up to when you're away. myQ provides whole-home access and monitoring solutions, ensuring pet parents can both check in on their pets and securely provide access when needed. Whether granting entry for a dog walker, a trusted neighbor, or a family member, myQ's smart indoor, outdoor, and garage access solutions make it easy to ensure pets are cared for anytime, from anywhere, all through the single, intuitive myQ app.

Why Pet Parents Need myQ

Recent insights from the [American Pet Products Association \(APPA\)](#) reveal that 70% of U.S. households own a pet. As pet ownership rises, so does the demand for smart solutions that enhance pet safety and well-being. myQ is here to meet that demand, offering:

- **Separation Anxiety Relief:** Over 40% of dog owners report feeling guilty or anxious when leaving their pets home alone. myQ's live monitoring, two-way audio, and motion detection features help ease that worry, allowing you to check-in and even talk to your pet throughout the day.
- **Simplified Pet Care Routines:** Whether it's granting secure access to a pet sitter or monitoring your pet's behavior, myQ ensures your pet is well cared for even when you're not home.
- **Ultimate Peace of Mind:** Real-time alerts let you know when your pet enters an off-limits area, ensuring their safety at all times.

A Smarter Way to Care for Your Pets

The **2025 myQ Pet Campaign** is designed to showcase the benefits of smart home access for pet parents, highlighting real-life scenarios where myQ enhances pet safety and connection.

Imagine you're at work, and your pet is home alone. Instead of worrying, you simply open the myQ app to check the live feed from your indoor camera. You notice they're getting a little anxious, so you use the two-way audio feature to reassure them with your voice. That's the power of myQ.
